Chapter I

Airport Usage Regulations (Excerpts)

- 1.1 All usage of the Airport, including but not limited to entering or traversing the Airport with or without aircraft, vehicles or other equipment, is subject to these usage regulations and to all stipulations and instructions issued by the Airport operator for the purpose of implementing these regulations.
- 1.2 Usage of the Airport is permitted subject to payment of the appropriate charges as specified in the regulations for Airport Charges. The Airport's terms of payment as constituted at the time of usage shall also apply (cf. Appendix 6). The utilisation restrictions imposed in the Authorisation to operate an airport, as published in the edition of the Aeronautical Information Publication (AIP) for Germany ("Luftfahrthandbuch Deutschland") current at the time of usage, including maps, must be observed.
- 1.3 The aircraft operators are responsible to provide the Airport with all documents necessary for the assessment of utilisation entitlement and for the calculation of charges.
- 1.4 All agreements, licenses and permissions required by these usage regulations must be obtained prior to usage of the Airport.

Chapter II

General Terms and Conditions

- 1.1 An emergency landing resulting from technical problems or failures encountered on an aircraft, or from a threatened or real act of violence or due to medical emergencies on board passengers shall not be subject to landing, take-off or passenger charges, provided the Airport was not the scheduled destination of the flight in question. A diverted landing shall not be considered to be an emergency landing.
- 1.2 The following are jointly and severally liable for all debts incurred in respect of these regulations:
- the airline under whose Airline Code and Flight Number the respective flight takes place;
 - the airlines under whose Airline Codes and Flight Numbers the respective flight takes place (Codesharing);
 - the aircraft operator;
 - the natural or legal person having usage of the aircraft whilst not the aircraft's operator or owner, such as a lessee or person renting the aircraft.
 - The owner of the aircraft.
- 1.3 Charges shall be paid in euros before take-off. Charges may be paid after usage subject to prior agreement and the provision of a security deposit in the form of cash or an unrestricted bank guarantee issued by a major bank resident in Germany. The Airport will levy late payment interest at a level of 3% over the current base rate, subject to a minimum of 8%, on all late settlements.
- 1.4 All charges count as charges ("Entgelte") in respect of §10 Paragraph 1 of the Value Added Tax Act ("Umsatzsteuergesetz"). The Airport user (debtor) is therefore liable for value added tax if and when the services provided are subject to value added tax.
- 1.5 For the accounting time counts the local time at Hamburg Airport (HAM, EDDH).

Chapter III

Regulations for Airport Charges

1. Airport Charges subject to regulatory approval

1.1 Landing and Take-off Charges

- 1.1.1 Every landing and take-off at Hamburg Airport is subject to a charge (landing charge or take-off charge, respectively). Charges, payable to the Airport operator, are calculated with respect to specified time periods.
- 1.1.2 Landing and take-off charges are also payable in the case of touch-and-go manoeuvres.
- 1.1.3. Landing and take-off charges are calculated on the basis of the Maximum Take-Off Mass (MTOM) as specified in the licensing documents of the aircraft in use, regardless of the actual operating criteria. The MTOM shall be provided by presentation of the Airplane Flight Manual (AFM) – Basic Manual Section for Weight Limitations or by the noise emission certification of the aircraft, before the first flight from/to HAM/EDDH and whenever the MTOM changes, without a specific request and without delay. Until this document is presented, the highest known MTOM for the make and model of aircraft in operation shall be used. Retroactive reimbursements will not be issued.

1.1.4 The MTOM-based component of the landing and take-off charges for powered aircraft is as follows:

	EUR per landing and per take-off
Jet turbine aircraft per 1,000 kg (or part thereof) MTOM	EUR 3.33
Aircraft with other power unit up to 1,200kg MTOM	EUR 11.06
from 1,200kg to 2,000kg MTOM	EUR 20.04
over 2,000kg MTOM (per 1,000 kg or part thereof)	EUR 3.33

- 1.1.5 For the weight of the aircraft, operated on scheduled services and regular charter flights, exceeding the maximum take-off weight of 250tons MTOM the fee specified under 1.1.4 will be reduced by 70% from the current EUR3.33 per 1,000kg MTOM per take-off and per landing to EUR1.00 per 1,000kg of MTOM per take-off and per landing.
- 1.1.6 For single aisle aircraft with a range of more than 8,000km (e.g. A321XLR) and from a flight distance of more than 5,000km from Hamburg, operated on scheduled services and regular charter flights, the in 1.1.4 stated charge of EUR3.33 per take-off and landing is reduced by 20% to EUR2.67 per 1,000kg MTOM per take-off and landing.
- 1.1.7 The noise emission surcharge (noise emission classes), late arrival, night surcharge and emission-based charges are excluded from the reduction stated in 1.1.5 and 1.1.6.
- 1.1.8 A noise surcharge will be levied on all landings and take-offs of aircraft exceeding 2,000kg MTOM. The noise surcharge is graduated according to noise emission classes. The noise emission classes are based on average noise emission levels per aircraft type and series, as measured in Hamburg.

Noise classes

For aircrafts of types A319, A320 and A321 with vortex generator a rebate of 10 % on the noise surcharge listed under 1.1.8 will be provided.

The airline has to provide a proof of the technical equipment of the aircraft types A319, A320 and A321 equipped with vortex generators, in order to allocate the aircraft to the respective noise categories.

Aircrafts which are not listed in the above index (because of not enough measurement results) will be classified subject to ICAO classification and MTOM according to the following list:

	ICAO-Annex 16 Chapter 3,6,8,10 or LSL III, VI, VIII, X	ICAO-Annex 16 Chapter 2 or LSL II without approval according to ICAO Annex 16, or LSL
Noise classes	MTOM	MTOM
1	to 30 t	
2	to 45 t	
3	to 75 t	
4	to 165 t	to 5 t
5	to 260 t	to 15 t
6	to 320 t	to 45 t
7	over 320 t	over 45 t

1.1.9 The charges listed under 1.1.4 to 1.1.8 are subject to a surcharge as follows:

Period	Surcharge
22:00 to 22:59	150 %
23:00 to 23:14	350 %
23:15 to 23:29	400 %
23:30 to 23:44	450 %
23:45 to 23:59	550 %
00:00 to 05:59	700 %

1.1.10 An emission-based charge is levied per take-off and landing.

Aircraft with MTOM not exceeding 2,000 kg

The emission-based charge is a flat EUR 0.2974 per take-off and EUR 0.2974 per landing.

Aircraft exceeding 2,000 kg MTOM

The emission-based charge is EUR 1.78 per emission value and landing, and EUR 1.78 per emission value and take-off; in other words, EUR 3.56 per emission value per standardised landing and take-off cycle (LTO).

The emission value is the measured amount of nitric oxide equivalent per kilogram emitted by the aircraft.

The relevant details for the aircraft and engine types shall be obtained from a recognised aircraft fleet database.

To determine the emission value, the ERLIG formula¹ shall be used, based on certified nitric oxide (NOx) and hydrocarbon (HC) emissions per engine in an LTO cycle as specified in the ICAO Annex 16, volume II.

Calculation formula:

$$NO_{x, aircraft} [kg] = (\text{number of engines} \times \sum_{Mode} \text{time [s]} \times \text{fuel consumption [kg/s]} \times \text{emission factor [g/kg]}) / 1000$$

Should the engine HC emissions per LTO cycle exceed a certified value of 19.6 g/kN, the aircraft's relevant NOx value shall be multiplied by factor a:

$$a = 1; \quad \text{for } Dp_{HC}/F_{oo} \leq 19.6 \text{ g/kN}$$
$$a = (Dp_{HC}/F_{oo}) / 19.6 \text{ g/kN}; \quad \text{for } Dp_{HC}/F_{oo} > 19.6 \text{ g/kN mit } a_{max} = 4.$$

Nitric oxide equivalent (= emission value) of an aircraft = a x NOx.

The emission value is factored in up to three decimal places.

The basis for determining the emission value is provided by the ICAO database for turbofan and jet engines and the FOI Swedish Defence Research Agency database for turboprop engines.

¹ERLIG = Emission Related Landing Charges Investigation Group, ECAC

If these emissions databases have either no entries, or varying entries, for a particular type of engine, the highest value listed shall be taken, regardless of the specific deployment criteria.

If an engine is not listed in any of the available emissions databases, and no standard engine can be used for calculation, the engine will be assessed according to the Deutsche Zentrum für Luft und Raumfahrt (German Aerospace Center or DLR) study from 28 February, 2005.

The airport operator must be informed without delay of any increase or reduction in the emissions value of an aircraft, based on AFM, ICAO certificate or manufacturer certification.

Aircraft movements for which increased emissions values are determined at a later date may be subject to surcharges; reduced values shall be taken into account for calculations as soon as possible once documentary evidence has been provided and verified. Reductions cannot be backdated and no refunds will be issued.

Should no emissions value be available at the time of invoicing, the emission-based charge per take-off and per landing shall be 10% of the charges according to 1.1.4.

1.2 Passenger Charges

- 1.2.1 For commercial aviation a passenger charge is levied in addition to take-off charges.
- 1.2.2 The passenger charge (per passenger on board the aircraft at take-off) is as follows:

for flights to airports within the Federal Republic of Germany

for local boarding	EUR 10.25
for transit	EUR 7.17

for flights to airports outside the Federal Republic of Germany and within the European Union or to airports within Iceland, Norway, Switzerland or Great Britain

for local boarding	EUR 10.25
for transit	EUR 7.17

for flights to airports outside the European Union

for local boarding	EUR 12.16
for transit	EUR 8.50

- 1.2.3 Transit passengers are passengers, who interrupt their travel by air in Hamburg Airport and proceed with the same aircraft as upon arrival.
- 1.2.4 Children under the age of 2 years without assigned seats on the aircraft are not included in calculating the passenger charge.

1.3 Terminal Charges – GAT

- 1.3.1 For usage, by crew and passengers, of the passenger facilities in the General Aviation Terminal, a terminal charge will be levied. A passenger charge is not levied for the General Aviation Terminal.
- 1.3.2 The terminal charge will be levied after every landing according to the aircraft’s MTOM, regardless of the services actually used. The following charges apply:

up to 2,0 t MTOM	EUR 14.03
up to 5,7 t MTOM	EUR 35.80
up to 14,0 t MTOM	EUR 50.43
up to 20,0 t MTOM	EUR 63.87
more than 20,0 t MTOM	EUR 125.13

1.4 Positioning Charge

- 1.4.1 A ground rent (“Positioning Charge”) is to be paid to the Airport for the parking of aircraft.
- 1.4.2 The positioning charge is calculated based on the licensed MTOM of the aircraft. – see 1.1.3 –
- 1.4.3 A positioning charge will not be levied for the time period between 11:00 p.m. and 4:59 a.m.
- 1.4.4 Daily Parking

The positioning charge per 15 minutes for each individual position occupation (or part thereof) is as follows:

up to 3,000 kg	EUR 0.4163
from 3,000 kg to 5,000 kg	EUR 0.6542
from 5,000 kg to 7,000 kg	EUR 0.8921
over 7,000 kg MTOM	
(per 1,000 kg or part thereof)	EUR 0.1190
There is a minimum positioning charge of	
EUR 4.57	

1.4.5 Long-term Parking

On Apron two a rental contract may be concluded between the aircraft operator and the Airport operator for parking of aircraft with a wingspan of less than 24m which do not require ground handling services.

MTOM	Monthly Charge	Annual Charge
up to 3t	EUR 526.68	EUR 4,515.57
up to 5t	EUR 659.25	EUR 5,637.63
up to 7t	EUR 704.86	EUR 6,040.80
over 7t (per t or part thereof)	EUR 89.98	EUR 773.02

1.5 Hangar Charge

1.5.1 An hourly ground rent (“Hangar Charge”) is to be paid to the Airport for the storage of aircraft in hangars at the Airport. The amount of the ground rent (Hangar Charge) is calculated according to:

- the licensed Maximum Take-Off Mass (MTOM);
- the duration of storage;
- the Hangar;
- the time of year.

The ground rent (Hangar Charge) per hour (or part thereof) for the storage of aircraft of all types is published in the Charges for extra Services.

1.5.2 The minimum billing period of time for the storage of aircraft per Hangar is 8 hours.

1.6 Security Charge

In addition to the landing and passenger charges, a security charge shall be paid. The security charge is to cover costs incurred as a result of the requirements of the Act on Aviation Security ("Luftsicherheitsgesetz") and the European Union directives for security in civil aviation.

The security charge is calculated according to the number of passengers on board an aircraft at take-off.

Children under the age of 2 years without assigned seats on the aircraft are not included in calculating the passenger charge.

No security charge will be levied for passengers who are checked in at the GAT.

The Security Charge is as follows:

EUR 1.37

1.7 Noise Protection Charge

In addition to the landing and passenger charges, a noise protection charge shall be paid. The noise protection charge is to cover costs incurred as a result of the requirements of the Act on aircraft noise ("Fluglärmmgesetz"). The noise protection charge will be levied on all landings and take-offs of aircraft exceeding 2,000 kg MTOM.

The noise protection charge is calculated according to the noise emission classes mentioned in 1.1.8.

Noise class	EUR per landing and per take-off
1	EUR 1.14
2	EUR 2.28
3	EUR 3.42
4	EUR 10.26
5	EUR 27.36
6	EUR 74.09
7	EUR 199.48

The noise protection charge is suspended until further notice.

2. Recovery Programme

2.1 The objective of the Recovery Programme is to support the recovery of passenger traffic after the Covid 19 pandemic. The Recovery Programme, which is not financed by fees in accordance with §19b LuftVG and therefore does not require approval, will be introduced for a period of three years, starting on 01 April 2022.

2.2 Traffic growth compared to the base year 2019 is incentivised above the correspondingly defined support thresholds. Incentive funding is granted for additional boarding passengers above the support threshold per quarter compared to the equivalent quarter in 2019 (e.g. Q1 2025 compared to Q1 2019):

Support Period	Period of Time	Incentive Threshold / Incentive Amount			
1	01.04.22 –31.03.23	65% / €3	70% / €9	80% / €10	90% / €12
2	01.04.23 –31.03.24		75% / €3	80% / €7	90% / €8
3	01.04.24 –31.03.25			80% / €5	90% / €7

2.3 All boarding passengers for an airline departing before 11 p.m. are taken into account for the period 01 April 2022 to 31 March 2025.

2.4 To qualify for support, the airline must have carried a minimum volume of 5,000 boarding passengers in the respective support quarter. They are considered with relation to the debtor used for billing purposes.

2.5 For airlines that have not yet flown to Hamburg in the respective quarter of 2019, or respectively for airlines that have carried less than 5,000 boarding passengers in 2019, the incentive will be limited to 15,000 boarding passengers to be supported per quarter and a maximum incentive amount of EUR 6 per boarding passenger.

2.6 Credit for the Recovery Programme is applied to accounting in the quarter following the respective incentive period.

- 2.7 The reassignment of individual routes within an airline group will not be supported. If, for example, a destination is taken over from a different airline within one airline group, these boarding passengers will not be taken into account for the calculation of the incentive.
- 2.8 The Recovery Programme ends on 31 March 2025.

Calculation example: Recovery Programme

Q2 2019 200,000 boarding passengers (reference period)
Q2 2022 190,000 boarding passengers (support period)

65 % to 70 %	= 130,001 to 140,000 boarding pax	10,000 x EUR 3	= EUR 30,000
70 % to 80 %	= 140,001 to 160,000 boarding pax	20,000 x EUR 9	= EUR 180,000
80 % to 90 %	= 160,001 to 180,000 boarding pax	20,000 x EUR 10	= EUR 200,000
Above 90 %	= 180,001 to 190,000 boarding pax	10,000 x EUR 12	= EUR 120,000
60,000 boarding pax			= EUR 530,000

3. **Airport Charges not subject to regulatory approval**

3.1 **PRM-Charge**

In addition to the landing and passenger charges, a PRM-Charge shall be paid. The PRM-Charge is to cover costs incurred as a result of the requirements of the European Union directives concerning the rights of disabled persons and persons with reduced mobility when travelling by air. The PRM-Charge is calculated according to the number of passengers on board an aircraft at take-off. Children under the age of 2 years without assigned seats on the aircraft are not included in calculating the passenger charge.

The PRM Charge is as follows:

EUR 0.32

3.2 Charges for the use of central infrastructure facilities

The following list of services and charges correlate to the centralized infrastructures which are determined by the Airport Utilization Regulations and must be employed. Responsible for the provision of the centralized infrastructures, that is to say, for the determining of the quantity and duration of the provision, is the Flughafen Hamburg GmbH.

3.2.1 Processing inbound baggage

- 3.2.1.1 Providing of conveyor and communication facilities for handing-over of baggage to passengers in the terminal.
- 3.2.1.2 Providing of rooms and areas for the handing-over of baggage to passengers.

For the services referred to above, the charge for the processing of inbound baggage will be invoiced to the airline company.

**The charge will be payable for every
calculated inbound baggage:**

EUR 1.84

The inbound baggage items are calculated, depending on the most accurate data source, either

- as the number of inbound passengers multiplied with the average individual previous year baggage load factor (items of baggage per outbound passenger) per airline

or

- on the basis of inbound baggage counts and the resultant average count of inbound baggage for one year. The basis for this calculation is 10 timetable events per departure airport per timetable period. Alternatively, data from the baggage reconciliation system for the airline may be used for airlines that have ordered this service from Groundstars.

or

- the average baggage quantity for one year based on the analysis of load messages.

3.2.2 Processing outbound baggage

- 3.2.2.1 Providing of conveyor and communication facilities for the sorting of outbound baggage.
- 3.2.2.2 Providing of rooms and areas for the sorting of outbound baggage in accordance with the sorting criteria determined by the respective airline.
- 3.2.2.3 Intake of processed and labeled baggage behind the check-in counter and transferal to baggage boxes (including coding) respectively to conveyors in the baggage sorting area.
- 3.2.2.4 Receipt and weighing of oversized baggage; transferal to baggage sorting area.

For the services referred to above, a charge for the processing of outbound baggage will be invoiced to the airline company. For the services listed above, the following charges will apply per piece of baggage. The charges are scaled in accordance with the respective airline’s sorting requirements:

Single sorting per piece of baggage	EUR 1.84
Double sorting per piece of baggage	EUR 2.79
Triple sorting per piece of baggage	EUR 3.69

3.2.3 Pier Charges

- 3.2.3.1 Maintenance, provision and utilization of passenger boarding bridges.
- 3.2.3.2 Providing facilities for the supply of ground power at pier stands and Walk-in-Walk-out stands.
- 3.2.3.3 Providing of ground power for aircraft (excluding operation of equipment); between midnight and 4:59 a.m., ground power will only be provided subject to a supplementary charge (refer to Schedule of Charges for Extra Services).
- 3.2.3.4 Providing of facilities for the supply of pre-conditioned air at pier stands.
- 3.2.3.5 Providing of pre-conditioned air for the supply of aircraft (excluding operation of the equipment); between midnight and 4:59 a.m., pre-conditioned air will only be provided subject to a supplementary charge (refer to Schedule of Charges for Extra Services).
- 3.2.3.6 Providing security personnel for route security at Walk-in-Walk-out stands.

For the services referred to above, the pier charges stated below will be invoiced to the airline company. Pier charges are calculated for every ton of MTOM commencing, and per unit of 15 minutes maximum 180 minutes commenced for inbound and outbound. The minimum charge is based on a weight of 20 tons MTOM.

The usage of facilities for ground power and pre-conditioned air is not included in this charge. No charge will be applied between 11:00 p.m. and 04:59 a.m.

Per commencing ton of MTOM and commencing 15 minutes: for the first 100 tons MTOM, but for at least 20 tons MTOM	EUR 0.6423
Per commencing ton of MTOM and commencing 15 minutes: over 100 tons MTOM	EUR 0.5472

3.2.4 Supply and Disposal Charge

- 3.2.4.1 Providing a drinking water supply facility and supplying drinking water in accordance with IATA regulations.

Transporting drinking water to the aircraft and replenishing the aircraft is not included in this service.

- 3.2.4.2 Providing a facility for supplying the aircraft with toilet flushing fluid and for the disposal of faeces. Supplying the flushing fluid. Disposing of faeces in accordance with legal regulations.

Transporting the flushing fluid to the aircraft and replenishing the aircraft with the flushing fluid, as well as pumping out the faeces and transporting them to the disposal facility, are not included in this service.

- 3.2.4.3 Providing a waste collection facility and disposing of waste in accordance with legal regulations.

Transporting waste from the aircraft to the collection facility is not included in this service.

For the services referred to above the Supply and Disposal Charge stated below will be invoiced to the airline company. The Supply and Disposal Charge will be payable for every incoming passenger.

per passenger

EUR 0.0714

3.3 Charges for the use of other infrastructure facilities

The following facilities are provided by the airport and are to be employed for typical processing procedures. The Flughafen Hamburg GmbH is responsible for provision, terms of allocation and administration.

3.3.1 Check-in Counter for passengers

- 3.3.1.1 Arrangement, provision and administration of check-in counters, as well as the technical facilities necessary for the processing of passengers, such as communication facilities, announcement systems and conveyance facilities.
- 3.3.1.2 Provision of storage areas and queuing areas near the check-in counters

For the services referred to above, the charge listed below will be invoiced to the contractor in question. Charge levied for the use of check-in counters apply for each commencing 15 minutes. The calculations are based on periods of time resolved in agreements on a day-to-day basis, which, unless subject to other arrangements, are extended up to Scheduled Time of Departure (STD).

per counter and each commencing 15 minutes	EUR 6.54
---	-----------------

3.3.1.3 Waiver of check-in fee for cancelled flight

The allocation of check-in counters is based on information available at 6:00pm the previous day, and it is this allocation which forms the basis for fee calculation.

Change requests on the day itself are accommodated wherever possible. Extra allocations lead to extra costs, which are also charged. Reduced requirements on the day are not reflected in fee calculation.

The use of check-in counters for flights cancelled on the day is not charged provided the Hamburg Airport Traffic Centre is informed of the calculation no later than four hours before STD.

3.3.2 CUPPS Equipment

CUPPS (Common User Passenger Processing System) is an infrastructural facility provided for the handling process.

For the provision of CUPPS a charge is to be paid irrespective of whether usage takes place via CUPPS or not.

The CUPPS-Charge is as follows:

per passenger on board the aircraft at take-off: EUR 0.12

3.3.3 Bus Transport Charge

Bus Transport Charge

In addition to the Landing and Passenger Charges, a Bus Transport Charge shall be levied for ground handling at a remote position.

- 3.3.3.1 A bus transport (outbound or inbound) describes the journey between the airport building and the parked aircraft.

The bus allocation time begins when the bus is requested by the scheduling system (inbound) or by the handling agent of the airline (outbound) as the start time and ends with the disembarkation of the last guest as the end time.

The bus transport charge per vehicle provided for each 20 minutes bus allocation time or part thereof is: EUR 50.00

This service will only be provided by the airport until 31 December 2025.
